

Executive Summary

Ferns & Petals Sales Analysis Dashboard

This project focuses on the development of an **interactive sales analysis dashboard** for **Ferns & Petals (FNP)** using **Microsoft Excel**. The primary objective of the project was to analyze customer purchasing behaviour, sales trends, product performance, delivery efficiency, and occasion-based revenue generation to derive meaningful business insights and support data-driven decision making.

The dashboard was created using advanced Excel functionalities such as **Pivot Tables, Pivot Charts, KPI Cards, Slicers, Conditional Formatting, and Interactive Visualizations** to provide a dynamic and user-friendly analytical interface.

Key Project Objectives

The dashboard was designed to address the following business problems:

- Analyze overall sales and revenue performance
 - Identify top-performing products and categories
 - Evaluate customer spending behaviour
 - Compare revenue generated across different occasions
 - Monitor delivery efficiency and order trends
 - Identify high-order cities and peak order timings
-

Key Performance Indicators (KPIs)

The dashboard successfully generated the following important business metrics:

- **Total Orders: 1000**
- **Total Revenue Generated: ₹35,20,984**
- **Average Customer Spending: ₹3,520.98**
- **Average Order-to-Delivery Time: 5.53 Days**

These KPIs provide a quick overview of the company's operational and financial performance.

Major Insights Derived

Occasion-Based Revenue Analysis

- Among all occasions, **Holi** contributed the highest share of revenue, indicating significantly high customer purchasing activity during festive periods.
- Occasions such as **Birthdays, Anniversaries, and Raksha Bandhan** also showed notable sales contributions.

Product & Category Performance

- Product categories such as **Sweets** and **Raksha Bandhan-related products** emerged as major revenue contributors.

- The dashboard identified the **Top 5 Products by Revenue**, helping in understanding customer preferences and demand trends.

Customer Behaviour & Spending

- The analysis highlighted average customer spending patterns and purchasing trends.
- Revenue distribution across different order hours helped identify peak customer activity timings.

Geographic Sales Insights

- The dashboard identified the **Top 10 Cities by Number of Orders**, enabling location-based sales performance analysis and potential market targeting opportunities.

Delivery Performance Analysis

- The average delivery duration of **5.53 days** provided insights into operational efficiency and logistics performance.

Dashboard Features

The dashboard includes multiple interactive and analytical features such as:

- Dynamic filtering using **Slicers**
- Occasion-wise revenue comparison
- Monthly sales trend analysis
- Revenue analysis by product category
- Order-time revenue trends
- KPI summary cards
- Customer spending analysis
- Top-performing products and cities analysis

These features make the dashboard highly interactive, visually appealing, and easy to interpret.

Tools & Techniques Used

Software Used

- **Microsoft Excel**

Techniques Implemented

- Pivot Tables & Pivot Charts
- Data Cleaning & Transformation
- KPI Dashboarding
- Conditional Formatting
- Interactive Slicers
- Data Visualization Techniques

- Business Analytics & Reporting
-

Conclusion

The Ferns & Petals Sales Analysis Dashboard successfully transformed raw sales data into actionable business insights through effective data visualization and analytical techniques. The project demonstrates practical skills in **data analytics, dashboard development, business intelligence, and reporting using Microsoft Excel**.

The dashboard can assist businesses in improving decision-making related to product strategy, customer engagement, sales optimization, and operational efficiency while providing a comprehensive overview of organizational performance.
